

Kellie Kumasaka

Portfolio: <https://kelliekumasaka.herokuapp.com> | **GitHub:** <https://github.com/kelliekumasaka>

Full-stack web developer with an education and linguistics background seeking to build user-friendly, optimized, and responsive websites. Have successfully earned a certificate in Full-Stack Web Development from the University of Washington and am mainly a JavaScript engineer with a desire to learn other framework languages. Known as a reliable and positive problem solver. Excited to develop my skills as well as contribute my insight towards a well-rounded team that seeks to make technology accessible and powerful.

jQuery

Experience

Sales Assistant and Administration

ATAGO USA Inc. | April 2021 – September 2021

In charge of processing and shipping orders, as well as payments. Create calling lists and gather relevant data for sales team. Organize and update work platform to ensure that our team is on the same page.

English Language Teacher

Tokyo Joshi Gakuen | August 2017 – October 2020

Planned lessons and helped lead various school events, club activities, private school fairs, open houses, etc. Organized and created a letter exchange program with an American school. Prepared and gave advice to students regarding standardized English proficiency exams.

Projects

Bullet Journal Squared

[Repo](#) | [Deployed](#) | **Role: Front-end Engineer**

- Bullet Journal Squared is a website that allows users to create an account, write journal entries, and view their past thoughts and feelings.
- This website was created for people who would like to keep their thoughts on a mobile site, stored so they can easily add and access it on-the-go. For this project, I was mainly in charge of creating front-end templates and as well as the long-term lists feature, from front to back.

Tools/Languages

- HTML, CSS, UI Kit, JavaScript, JQuery, Handlebars, Cloudinary, GoogleFonts, Moment, TypeFit API
- MySQL2, Sequelize, Express, NodeJS, Bcrypt

Pet-It

[Front-end Repo](#) | [Back-end Repo](#) | [Deployed](#) | **Role: Back-end Engineer**

- Full stack social networking app allowing users to inform each other on the pet-friendliness of employers and establishments.
- Pet-It is a user-driven website that gives users the power to review businesses and jobs on how pet-friendly they are, and leave comments on that place. I was in charge of setting up the back-end models as well as creating the routes and incorporating redux into the front-end.

Tools/Languages

- React, CSS, UI Kit, JavaScript, JQuery, Redux, Cloudinary, Moment, JSONWebToken, GooglePlaces API
- MySQL2, Sequelize, Express, NodeJS, Bcrypt, axios, CORS

Animal Crossing Island Manager

[Repo](#) | [Deployed](#) | **Role: Front-end Developer**

- A website to keep track of your items and villagers for Animal Crossing New Horizons.
- This project was meant for users of the ACNH to easily track their items, look up information about different items, and find information on their villagers as well. My role was to work on the JavaScript, specifically the sorting functions and how they interact with the API.

Tools/Languages

- HTML, CSS, Materialize, JavaScript, JQuery
- ACDB, ACNH API
